## Boiler Inspection Guide Book

A key resource for plant personnel is Clark-Reliance's complimentary Boiler Drum Level Instrumentation Inspection Guideline Booklet. This easy to understand guidebook is a handy, on-the-job reference of ASME Section I drum level instrumentation design & inspection requirements.

The booklet includes Code requirements for water columns, water gage valves, gage glass, remote level indicators, magnetic water level gages and water column isolation shut off valves. Completely up to date, the 2022-23 Edition includes 2021 Code changes and CSD-1 requirements as well as recommendations from Section VII.
