

1 December 2023

## Notification of Product Obsolescence

for

Jerguson 143, 144, 63, 64, 66, 67, 73, 74, 84 Safety Ballcheck Valves  
Jerguson 56 Tubular Gage Valve

End of Sale: 1 July 2024 (Carbon Steel & 316SS)

Due to a steady change in customer preference over time which now overwhelmingly prefers offset style valve bodies as well as the release of the 60LE Series low emissions Safety Ballcheck Valves the following valves are being phased out:

The 56 series tubular gage valve  
140 Series straight pattern valves: 143 and 144  
70 Series straight pattern valves: 73 and 74  
80 Series straight pattern valve: 84  
The entire 60 Series: 63, 64, 66, and 67

These valves will be available for purchase in carbon steel and 316SS bodies only, until 1 July 2024 (depending on available inventory). Please note that as we approach end of life the price for these valves will increase significantly.

Exotic materials are no longer available for these valves, effective immediately. We will honor any outstanding, valid quotes as well as all open, acknowledged orders for exotic materials.

We understand there is a substantial install base so spare seats, stems, packing, and gaskets will be available for these valves, as applicable, in the online parts store until at least 1 July 2025.
