

60LE Series Safety Ballcheck Valves

Section: J100 Bulletin: J100.51 Date: 04/2021

Union Bonnet Valves

Series 60LE for Reflex or Transparent Flat Glass Gages

Jerguson[®] No. 60LE Series Valves are constructed to the highest of standards. The updated design removes the stem threads from contact with the process fluid by locating them behind the valve packing seal. This important feature prevents corrosion on the threading and provides a barrier inhibiting the ability of particulate to interfere with the hand wheel operation. The valve is low emission certified to API 624

to provide compliance with EPA standards. Quality features include stainless steel stems, seats, and ballcheck, regrindable and renewable seats.

- Stem threads outside the process fluid - US Patent No. 9,920,840
- Low emission certified to API 624
- Regrindable, renewable seat
- · Unions with spiral wound gaskets

NO. 60LE SERIES VALVES

The series consists of the following valves:

No. 63LE – straight pattern with non-union gage connection

No. 64LE- straight pattern with union gage connection

No. 66LE - offset pattern with non-union gage connection

 $\ensuremath{\text{No. 67LE}}\xspace$ – offset pattern with union gage connection

PRESSURE RATINGS

Carbon & Stainless Steel Valves Series 60LE Temperature / Pressure

Temperature		Pressure			
۴	°C	PSI	BarG	Kg/cm ²	kPaG
100	38	4000	275.8	281.2	27579
200	93	3615	249.3	254.2	24928
300	149	3231	222.8	227.2	22276
400	204	2846	196.2	200.1	19624
500	260	2462	169.7	173.1	16973
600	316	2077	143.2	146.0	14321
700	371	1693	116.7	119.0	11670
800	427	1308	90.2	92.0	9018

Saturated steam rating 600 WSP

STANDARD FEATURES

Safety Shut-Off: All No. 60LE Series Valves are equipped with a stainless steel ballcheck located upstream from the seat which instantaneously shuts-off flow of fluid in case of gage failure. Vertical rising ballchecks are available for compliance with ASME Section I or the ball may also be omitted on request.

Union Process Connection: Series 60LE Valves are equipped with union process connections which permit simple installation and easy access to the ballcheck. A spring clip secures the ballcheck in place so that it does not fall out when the union process connection is removed.

Union Gage Connection: Nos. 64LE and 67LE are furnished with a union gage connection which allows a top and bottom connected gage to be rotated to any desired angle for convenient visibility. It also makes possible removal of the gage without removing the valves or draining the liquid from the vessel - a feature which saves time when gages must be cleaned or maintained.

Offset Pattern: Nos. 66LE and 67LE valve bodies are designed so the gage connections are offset 7/8" from the centerline of the vessel connections. By removing the vent or drain plug, the interior of a top and bottom connected gage may be swabbed without disassembly.

Regrindable, Renewable Seat: The seat may be reground using the sleeve as a guide. The seat may be removed or replaced using a standard 5/8" socket wrench.

How to Specify 140, 60LE and 70BL Series Safety Ballcheck Valves
