

2720F6-A

Air Atomizing Filter Element

Dimensions

Length: 21-1/2"
OD: 8-1/2"
ID: 4-1/2"

Surface Area

Radial Fin technology for extended Surface Area (16.1 Sq. Ft.) and dirt holding capacity.

Micron Rating

Efficiency 98% at 1 UM

Construction

Media: Felted glass
Support Layer: Hot dipped galvanized steel backup wire and backwash screen
Core: Carbon Steel
Gasket: Glass rope

Recommended Operating Conditions

Changeout Differential Pressure: 15 PSI
Maximum Temperature, Continuous: 400°F
Maximum Temperature, Intermittent: 450°F
