Subject: 2022 Price Review

Valued Customers & Business Partners:

Please note that due to continued price pressures throughout the supply chain, we will be implementing a general price increase of 4% effective May 1, 2022. We do not take price increases lightly and feel we have continued to limit the magnitude of supply chain increases that we need to pass along.

Our intention is for this increase to see us through the 2022 calendar year provided material markets settle. We will be monitoring key indices as we move through next year and may need to take further action, although that is neither our plan nor desire at this time.

We appreciate your continued support and collaboration to implement product solutions that maximize value for our business partners.

Please do not hesitate to contact me with any questions or concerns.

Best Regards,
